CNP            Community Notification Plan  
HPS            Hunters Point Shipyard  
ICP            Integrated Contingency Plan

## 1.0 PURPOSE AND SCOPE

The original Community Notification Plan (CNP) was developed in 2001, with participation from both the Navy and community representatives. The purpose of this plan is not only to outline community notification procedures, but also to contribute to the ongoing trust-building process between the Navy and the Bayview Hunters Point Community.

Primarily, procedures in this plan will be activated during and/or following any incident at Hunters Point Shipyard (HPS) that may cause general health and safety concerns to the community. Secondly, the Navy will send out information when activities on the base, usually connected with the environmental cleanup program, are of general interest or may be of general interest. This plan includes contact lists for Navy personnel, community representatives, regulatory agencies, government officials, and local media. The plan also establishes protocols for community responses and inquiries regarding an incident in order to establish effective "two-way" communication between the Navy and the community.

## 2.0 NOTIFICATION PROCESS

During and/or following an incident, the Navy will notify key community representatives, who will in turn disseminate information to the rest of the community. Community notification will be done via e-mail, telephone, or fax, using the contact lists included in Appendix A. Community notification will be performed by a Navy official, most likely either the, Navy Base Realignment and Closure Environmental Coordinator, the officer-in-charge of the Navy Caretaker Site Office (located at Treasure Island), or the Navy Public Affairs Officer. The contact lists provided in Appendix A, are divided into the following categories: community representative contacts (see Table A-1), Navy contacts (see Table A-2), regulatory agency contacts (see Table A-3), City and elected officials (see Table A-4), Hunters Point Shipyard consultants (see Table A-5), local media contacts (see Table A-6), and general emergency contacts (see Table A-7).

Notifications or information inquiries will be made based on the table below.

<b>Flow of Information</b>	<b>Corresponding Contacts List in Appendix A</b>
From the Navy to the community	Table A-1
From the community to the Navy	Table A-2
From the Navy to regulatory agencies	Table A-3
From the Navy to City and elected officials	Table A-4
From the Navy to the consultants	Table A-5
From the Navy to local media	Table A-6
General San Francisco Emergency Contacts	Table A-7

The contact lists provided in Appendix A will be updated with each revision of the document (see Section 5.0 for revision timeframes).

Once the Navy has notified community representatives per the above procedures, the representatives will then be responsible for accurately and efficiently disseminating the information to the community.

### **3.0 NOTIFICATION TIMEFRAME**

Notifications made to the community per this plan will be carried out within a maximum of 72 hours from occurrence and will fall into two categories.

1. Incidents that may cause immediate or potential risks to the community will be reported as soon as possible, but within 24 hours.
2. Incidents that would be of general interest to the local community but do not pose a risk to the community will be reported as soon as possible, but within 72 hours.

For both categories of incidents, the Navy will make all possible attempts to disseminate a "general" summary of the situation as soon as possible, usually by a e-mail to the contacts listed in Tables A-1 through A-5, and will follow up with a more complete explanation of the incident within the timeframes listed above. This is intended to keep the community informed even in the early stages of an incident, regardless of its size, and to continue to build a level of trust between the Navy and the community.

### **4.0 INCIDENT CLASSIFICATION**

Some examples of incidents that may pose an immediate or potential risk to the community are uncontrolled fires that generate smoke plumes, releases of hazardous substances (such as a chemical spills), explosions, and any other incident that allows the potential migration of site contaminants from HPS into the community.

Some examples of incidents that do not pose an immediate risk to the surrounding community but may still be of concern to the community are (1) discovery of new environmental contaminants during cleanup operations, (2) small contained fires that do not generate significant amounts of dust particulate or smoke, (3) acts of vandalism on the base, (4) general police and fire department responses to the base, (5) boating activities on the piers or in the adjacent waters at HPS, and (6) any other incident that may be of interest to the community.

The above classifications are provided as examples only, and the list is not all-inclusive.

## 5.0 COMMUNITY "FEEDBACK" TO NAVY

In order to establish an effective "two-way" communication system between the Navy and the community, this plan also accounts for community feedback. The community may report incidents to the Navy or request additional information by using the contacts listed in Table A-2. These contacts may also be used to request a meeting focusing on any issues that may be of immediate concern to the Navy.

## 6.0 REVISION AND TESTING OF THE CNP

This plan will be reviewed and revised by the Navy, at a minimum, on a yearly basis. During review and revision of the plan, the Navy will examine the following elements:

- Contact lists: contact information will be verified and revised as necessary
- Community representatives: community representatives will be added or deleted as appropriate
- Local media resources: new resources will be added and outdated resources will be removed, as applicable

If no CNP messages are sent for a 6-month period, the Navy will send a "test message" to the community contact list. This test results will be used to check the efficiency of the process and the accuracy of the contact information, and to ensure that each person on the community representative list is still interested in receiving information.
